FULL STACK DEVELOPER

Summary

This is Osman.

① Self-introduction

I am a full stack developer, having 8+ years of experience in building medium and big web applications. I would also like to inform you that I am highly skilled with Node.js, Firebase, MongoDB, Webpack, ES6, API Integration, as I have handsome experience in it. As the modern JavaScript technologies came in, rather than using server-side rendering technologies tuned up with jQuery, I have been using Node.js, React.js, Vue.js, Next.js for 8+ years for Front-end development.

Also, recently, I have experience in developing Cryptocurrency trading sites such as Bitcoin, Ethereum, and NFT using Blockchain technology.

② Development experience

I would be happy if we could create a software product where you can feel love.

To that end, I think it is important to seriously work on the projects requested by our customers.

Experience

Senior Blockchain Developer, AKaz (fully Remote)

04/2020 - 1/2022

- DEX and Centralized Crypto Exchange Payment Integration
- Multichain Web and Mobile Wallet
- Crypto Betting and Casino
- Yield Farming Protocols
- Automated Market Making (AMM) Protocols
- Flash Loans
- Impermanent loss, governance tokens
- P2P/Pool Lending and Borrowing
- Crypto Collectible Platforms and Non-Fungible Tokens
- Custom dApps
- NFT Game Development
- ERC20, ERC777, ERC223, ERC721, ERC1155 Smart Contract Development
- Token De
- Trading bot with strong strategies (Front running, snipping, arbitrage, contract bot)
- NFT marketplace with Smart UI and high-end functionalities in Ethereum, Binance, Cardano, Solana, etc

FULL STACK DEVELOPER

Senior Full Stack Developer. Lead Edge Consulting Co.,Ltd

02/2019 - 4/2020

- Back-end and Front-end development
(Front end: React, Vue, Angular, Back end: Node, Python, PHP)
- Payment Integration (Paypal, Stripe, Worldpay, Afterpay)
- Google Map & Social API integration
- Firebase, Cloudstore, Google Cloud integration
- SMS api integration like twilio, africanstalk.
- Blockchain project developing on the several blockchain net.
- Cooperate with developers to create clean interfaces and simple, intuitive interactions and experiences.
- Develop project concepts and maintain optimal workflow.
- Work with senior developer to manage large, complex design projects for corporate clients.
- Carry out many Blockchain, NFT games, token generation, Mern Stack development. As a result, I got an excellent estimation from my company.

Senior Python Developer, Biera (fully Remote)

01/2018 - 02/2019

- Supported large enterprise customers by implementing and deploying mission-critical chat-bots built with Rasa. Deployments use Docker, Docker Compose, Kubernetes, and OpenShift. Infrastructure a combination of on-prem, AWS, GCP, and Azure.
- Designed and implemented NLU data, dialog stories, rules, forms, and custom actions (Python) for industry-relevant demonstrator chat-bots.
- Extended Rasa Open Source (Python) available at <https://github.com/rasaHQ/rasa>. This is an open-source machine learning framework to automate text- and voice-based conversations: NLU, dialogue management, connect to Slack, Facebook, and more.
- Created and taught an online course on advanced deployment techniques with Kubernetes
- Implemented Python Asyncio in back-end APIs resulting in dramatically improved throughput rates.
- Created CI/CD pipeline that trains a Rasa bot, builds a custom docker image, stores the artifacts in AWS S3 and AWS ECR, automatically creates an AWS EKS cluster using the eksctl CLI, deploys Rasa with Helm, and Smoke Tests using Python.

FULL STACK DEVEKOPER

Senior Software Developer, Toex. (fully Remote)

05/2016 - 01/2018

- Built a web-based intranet application to streamline the process of managing in-house training data within the organization.
- Worked closely with the project champion, stakeholders, and users to learn the business workflow and identify the pain points that could be eased with automation.

Senior Software Engineer, UPWORK (fully Remote)

05/2012 - 06/2016

- Implemented features for the main site and internal applications using TypeScript, React, Redux, Python and SQLAlchemy.
- Improved and upgraded the development tooling and workflow for several projects (TypeScript & Python).
- Coordinated the scrum process and helped improve communication within and between teams as scrum master for two teams.
- Developed a blockchain explorer and cryptocurrency accounting system for Bitcoin and Ethereum.
- Implemented a method for efficiently tracking the flow of funds between different addresses.
- Deployed the system on DigitalOcean using Docker

Education

Bachelor's Degree of Computer Science, Computer Information Systems, Bilkent University (2012-2016)
