SUMMARY

Creative and efficient full-stack and blockchain developer with over 5 years of experience.
Looking to take a part in a challenging project related to blockchain and cryptocurrencies.
I am familiar with most JavaScript frameworks and PHP frameworks which is very helpful to build blockchain project and have being working on many projects for 8 years.
I have experience in developing DApp, NFT, Marketplace, DeFi, DEX, P2E game, WAX, DAO, Token, AI, Trading Bot and many other blockchain projects.
Specialy, I have the technical know-how to reduce gas fee and prevent attacking in developing Smart Contract.
Provide clear, clean, readable, optimized, high quality code.
I have an important ability to work well in a team environment and good experience in project version control such as SVN, Git, Gitlab, Bitbucket and Trello.

EDUCATION

Bachelor of Computer Science

Singapore Management University

📅 2011 - 2015

EXPERIENCE

Senior Full Stack Developer

Labrys

📅 11/2015 - 07/2016 📍 Australia

Labrys is a global leader in blockchain product development.

- My role was web developer and main skills is React, Angular, Vue and Node, Laravel backend
- Built mobile responsive and pixel perfect UIs with React components to be easy to re-use and maintain
- GraphQL API, RESTful API, web3.js library integration with front end.
- Many UI libraries - MatrialUI, Tailwind, Bootstrap, Antd and so on.
- As you can see in here https://www.realtor.com/
- I develeoed this React website, I have developed React frontend, Node.js backend and design Mongoose schema, MongoDB
- And I developed and contribute in 6 big, middle and small project so now I have strong knowledge in React, Vue and Angular

SKILLS

Blockchain

Ethereum   Binance Smart Chain

Polygon   DeFi   DEX   NFT

DApp   WAX   DAO   Marketplace

Token   EcoSystem   Smart Contract

P2E Game/Architecture   Solidity

Trading bot   web3.js   ether.js

Contract test frameworks   Truffle

Remix   Hardhat

Web development

Most SPA frameworks   React/Redux

React Hook   Vue/Vuex   Angular

Node.js   Express.js   PHP

Laravel   Python   Django   Flask

Other

Git   Gitlab   Bitbucket   Trello

DevOps   AWS

EXPERIENCE

Senior blockchain developer
Dapplica

📅 07/2016 - 10/2017   📍 Ukraine

Dapplica is a blockchain development company building projects in the blockchain and cryptocurrencies industry.

- My role was blockchain developer main skills are solidity-smart contract, web frontend and web3.js
- Main projects are NFT minting DApp, marketplace and DeFi, DEX.
- Developed more than 10 blockchain projects with eight teammates and completed project successfuly
- NFT website
  http://rikishi.io/
  http://cybershibas.com
- DeFi app
  https://polycat.finance/
- These are some of my works and developed minting app alone and work on DeFi project with 3 of my teammates

Senior blockchain developer
Rather Labs

📅 11/2017 - 07/2019   📍 Argentina

Rather Labs is an expert company who develops blockchain projects. Expertise involves finance, real state, gaming, and others.

- My role was senior blockchain developer and main skills are solidity-smart contract, rust-smart contract, tokenomics, DeFi, DEX, Staking, Farming, NFTs
- Mainly, developed nft-minting, marketplace, DeFi and DEX.
- And frontend development using React/Redux and React Hook
- git, github, Trello
- As you can see in here
  https://www.croxswap.com/
- In here I developed one of my teammantes for 10 days
- And I contributed in 12 big, mid and small blockchain project
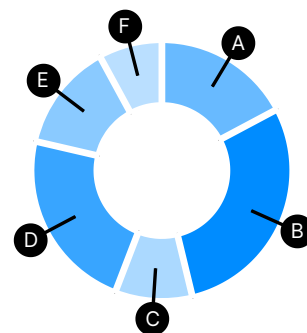

Senior blockchain engineer
LimeChain - Blockchain & DLT Solutions

📅 09/2019 - 02/2022   📍 Bulgaria

LimeChain is a company that offers blockchain consulting and development services. Its service lineup includes decentralized application development, private blockchain development, decentralized organizations, token offering, wallet development, and others.

- My role was senior blockchain developer and project manager with 7 years experience in blockchain developmenet
- Mainly developed DeFi, DEX, WAX, NFTs, Marketplaces
- And Frontend development using React/Redux and React Hook, web3.js
- git, Bitbucket, Trello
- As you can see in here https://www.wizardium.io/
  I contributed in this big blockchain P2E game project and maily, frontend and solidity smart contract development.
- And have developed many blockchain projects and managed projects

MY TIME

- **A** Analytics/Research
- **B** Design and find optimized solutions.
- **C** Work
- **D** Testing
- **E** Fix issues
- **F** Finishing
