Education

2012-09 - 2015-08	Polytechnic University of Madrid
	Madrid

Bachelor's Degree Computer Application

Work experience

2020-09 - 2022-01	PayAccept
	Netherlands

Blockchain Engineer & Full-Stack Developer
- Developing various kinds of Smart Contracts such as NFT minting, NFT marketplace, Defi ones in Solidity and Solana.
- Developing beautiful and responsible Front End using React, Vue, Typescript, ChakraUI and TailwindCSS.
- Developing interaction using Web3.js
- Built and maintained strategic relationships with potential investors and business partners and brainstormed new ideas.

2019-09 - 2020-06	Guadaltel, S.A.
	Spain

Smart Contract Engineer
- Developing tokens with wonderful tokenomics for NFT game.
- Developing web-based applications in ReactJS and storing the transactions in ethereum Blockchain.
- Developing condition-based contracts using solidity and deploying smart contracts in Testrpc.
- Migrating Java based web application from centralized cloud to decentralized cloud and saving the records as transactions on ethereum blockchain.
- Migrating to Blockchain technology from client's legacy systems.

2018-03 - 2019-06	FreeLancer & Project Contractor
	Spain

Blockchain Engineer & Front End Developer
- Developing Solidity and Solana Full - Projects with React, Vue, Solidity, Rust and Web3.js

Work experience

2017-01 - 2018-03
MALLORCA-ASESORA.COM
Spain

Full-Stack Developer

- Building Fantastic Front-End using React, Vue, Typescript and CSS template like Bootstrap.
- Hands on experience with various file systems (IPFS, COBAL) and databases like Oracle, NoSQL, MongoDB, Teradata etc
- Solid experience in all phases of application development life cycle involved in design, development, testing and not limited to production support.
- Involved in writing various scripts in Python and JS for writing automated scripts for scheduled queue process commands.

Portfolio

2022-01 - 2022-02
https://managetech.herokuapp.com/
Japan

Fulll-Stack Develper

- Using Vue.js for FrontEnd and also used Ruby On Rails for development of Backend.
- Building DB is by PostgreSQL and Deploying using Heroku service.

2021-08 - 2021-11
https://hubbleprotocol.io/
United Kingdom

Solana-Rust | Solana-Web3 | React(TypeScript) Developer

- Developed Solana-Web3 on React(TypeScript) based Front-End
- Developed Solana-Rust for Vesting Schedule which is deployed onto testnet & devnet
- Review & Developed Smart Contract on Ubuntu and Windows WSL.

2021-05 - 2021-07
https://www.lunachow.com
United States

Smart Contract Engineer

DeFi project

- Developing and Deploying tokens to the different network(Ethereum, Binance Smart Chain, Polygon, Harmony, Avalanche and Solana.
- Developing NFT marketplace with React and Solidity.

2021-01 - 2021-02
https://procamelriders.com
United Arab Emirates

Full-Stack Developer

I developed Wonderful Camel NFT minting project from start to end.

- Built Smart Contract in Solidity and deployed it to the Main net.
- Developed FrontEnd using React+Typescript+ChakraUI and Web3.js for the interaction.

2020-10 - 2021-01
https://www.ethereumx.com
Spain

Blockchain Engineer

I developed ETHX token and Presale smart contract by Solidity

- Making Token contract using solidity
- Providing liquidity
- Making Presale smart contract
- Feature for buying and claiming Token
- Building Front End using Vue.js and Web3.js

2017-06 - 2017-07
https://profilm.ru
Spain

FrontEnd Developer

- Using React and Bootstrap to build site
