WORK EXPERIENCE

Senior Software Engineering Manager
Zinier

04/2020 - Present   *Bengaluru, India*
Intelligent field service automation platform that helps organizations transform how they coordinate and execute field work to maintain infrastructure that people rely on daily basis. We are a diverse team, HQ in Silicon Valley and have raised US$120M+ from investors including Accel, ICONIQ, and Tiger Global.

Achievements/Tasks
- Managed over 20 people across Engineering, Operations & Finance
- Promoted a team culture of conscientiousness, accountability and fun despite being composed of many cultures with large time zone gaps
- Partner with Data Science and UX teams to increase customer engagement and lead growth
- Driving a data driven culture not just within the platform but with entire team
- Review performance design to make sure scalability is not an afterthought
- Work with Product, PMO and senior engineering leadership to prioritize quarterly projects that aligns with company goals and OKR's

Interim Director of Solution Development
Zinier

07/2020 - 11/2020   *Bengaluru, India*
Achievements/Tasks
- Led Solutions Delivery (Architect) team as Interim Director, overseeing a 8-person team responsible for executing on 8 concurrent projects in a timely and satisfactory manner
- Kickstarted the "Pooled Resource Initiative" to aggregate developers across Sales Engineering, Product Demo and Solution Delivery to streamline training and allocation of resources. The move is critical in enabling the company to transition towards more partner-led projects

Frontend Engineer
Zinier

09/2014 - 09/2017   *Palo Alto, United States*
Achievements/Tasks
- Develop functional and appealing web- and mobile-based applications based on usability
- Manage weekly scrums and work closely with other team members
